EXPERIENCE

LAZOAS DE DIGNIDAD | Web developer

Mar 2020 – Nov 2020

I developed a web page in PHP using object-oriented programming and connecting it to a MySQL database. The website included a section for customers and an administration panel to manage the site. The development was carried out without using a Framework, which allowed me to improve my programming and web design skills.

SENA | developer

Jun 2021 – Nov 2021

Feb 2022 - Dec 2022

During my position, I have worked on implementing applications using a variety of tools and technologies, such as C# on Windows Form, ASP.NET for the API, and a SQL Server database. Additionally, as part of my preparation for the WorldSkills competition, I have used a wide range of technologies to develop desktop, mobile and web applications. In particular, I have worked with C# to develop web pages and desktop applications, using the Entity Framework. I have also done automated tests in C# with UNIT, developed mobile apps in Kotlin, and built web pages using JavaScript with the Vue.js Framework.

- *I managed to be WorldSkills Colombia Champion in the IT skill Software solutions for business*
- *I became WorldSkills Chile Champion in the IT skill Software solutions for business*
- *I achieved the Worldskills Special Edition Medal of Excellence in South Korea.*
- *Received Medal for Young Guajiro Merit.*
